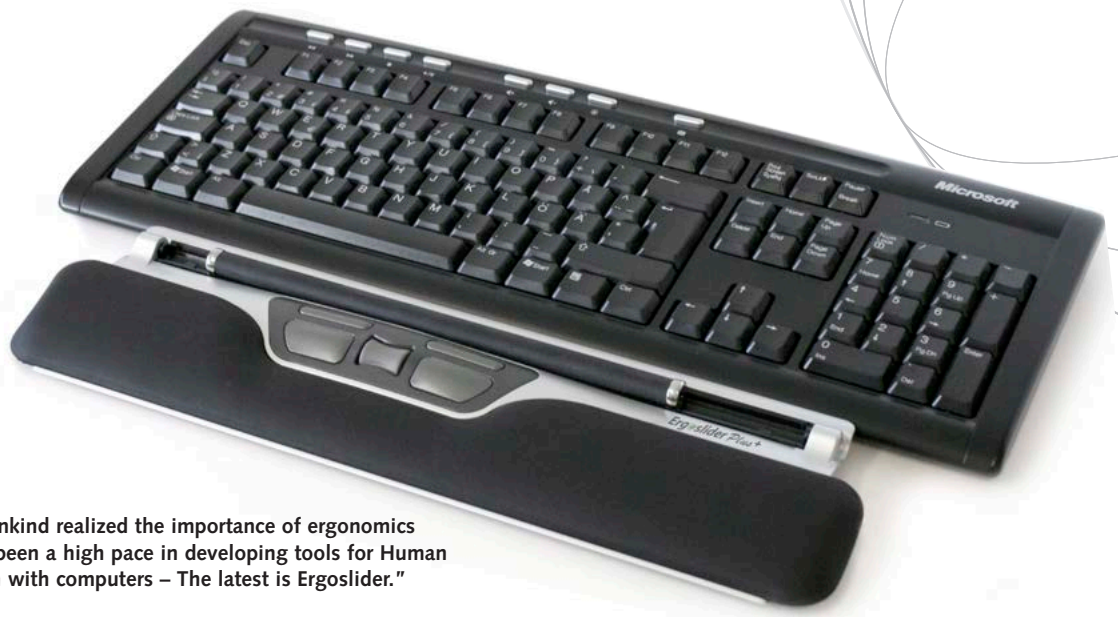
Ergoslider™

by Kondator



"Since mankind realized the importance of ergonomics there has been a high pace in developing tools for Human interaction with computers – The latest is Ergoslider."

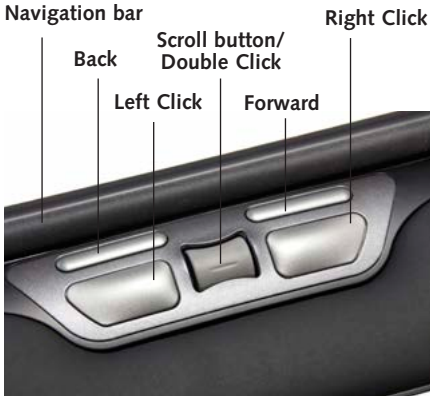
Ergoslider an ergonomic choice

The most slimmed pointing device world-wide!

Considering ergonomic issues

Ergonomics is the science of designing the job, equipment, and workplace to fit the worker. Proper ergonomic design is necessary to prevent Repetitive Strain Injuries (RSI), which can develop over time and can lead to long-term disability.

The International Ergonomics Association defines ergonomics as follows: Ergonomics (or human factors) is the scientific discipline concerned with the understanding of interactions among humans and other elements of a system, and the profession that applies theory, principles, data and methods to design in order to optimize human well-being and overall system performance.



The solution to ergonomicly poor workplaces

Ergoslider provides variation
Ergoslider is an ergonomic mouse option that enables you to vary your work position at the computer simply by switching between the left and right hand. With Ergoslider you control your computer with both hands, simultaneously or alternately.

Ergoslider relieves strain
The centred work approach with your arms relaxed and close to the body, decreases the load on your shoulders and neck and prevents or relieves Repetitive Strain Injury (RSI). Sit or stand near the table, working with arms near the body, the forearms should preferably be close to your sides. The keyboard and Ergoslider should be located close together, as close to the body as possible. Work with your hands as open and flat as possible, this reduces the static load on hands and wrists. The built-in wrist support provides soft relief on a wide surface. You can even relieve your shoulders and neck by resting your arms against the table or on a comfortable forearm support.

Ergoslider is very simple to use
You click, control and scroll using the bar and buttons. Ergoslider connects quickly with the supplied USB cable, no installation is required. Ergoslider is ultra-slim, only 23 mm.

STOCKHOLM FURNITURE FAIR

ORGATEC

Heard at the Stockholm Furniture Fair & Orgatec Cologne

"This is exactly what we need..."
Well-known Bank

"God, how slim... and smart"
Appriciated visitor

"Cool.. extremely slim design"
Ergonomic consultant

"This new 'look' is very attractive..."
Well-known Architects

"This is something for us"
Leading account firm

"Feel very good... great!"
